

# Traveling Buddies!

## NF Buddies Around the World!

Hi! My name is Buddy, and I LOVE to travel! I am taking a vacation around the world, meeting children affected by Neurofibromatosis. The "NF Buddies" book has taught me a lot about NF, and I would love to share the book with you!

There are thousands of children throughout the world with Neurofibromatosis. "Buddy" is a teddy bear who hopes to visit them all! He would like to drop by your house for a one week visit. Buddy travels through the mail, accompanied by a copies of the "NF Buddies" book. During his visit, we would like you to read Buddy's book, sign it, and then pose for a photo postcard with Buddy. Your parents will then help you mail the postcard to NF Inc. California and send Buddy to meet his next new friend. We will post the photo online, along with your first name (or a nick name) and the name of your state, country, or province.

Note to parents - As parents ourselves, our board members are very excited about this program and are dedicated to preserving the privacy of the children. Our goal is to help the children feel less isolated while learning a great geography lesson! We would love to have you join us in this worthy cause!

If you have any questions about this program or would like to sign up to host Buddy, email Maria, [staffwriter@nfcalfornia.org](mailto:staffwriter@nfcalfornia.org)

Buddy hopes to meet you soon!
